Lakeside Heart & Vascular Center offers a full service clinic for diagnosing and treating cardiovascular diseases, with several small specialty clinics dedicated to particular needs, including the Coumadin Clinic, the Heart Failure Clinic, the Pacemaker Clinic, and the Vascular Clinic for the testing and treatment of Peripheral Vascular Disease. All testing is done in our office. Lakeside Heart is the first clinic in the area offering cardiac catheterization via wrist, rather than the traditional entry through the groin area.

As promised, Lakeside Heart is always adding new services to the area. This year they also expanded their Heart Failure Clinic which is the only one in the area. The goal of this clinic is to minimize hospital visits for heart failure. This clinic also provides educational reference materials about heart failure. Patients will be seen within 24-48 hours from being discharged from the hospital.

Please call a Lakeside Heart & Vascular Center near you for an appointment.
