BREAST CANCER AWARENESS | GOOD HABITS

How to Do a Self-Exam

You should be checking your breast for changes at least once a month, according to the National Breast Cancer Foundation and Johns Hopkins Medical Center.

About 40% of diagnosed breast cancers are detected by women who feel a lump and get it checked out. Here's how to properly conduct a self-exam.

**IT'S NOT A MAMMOGRAM**

A self-exam is useful, but remember, it's not the same as a mammogram or other imaging that can detect cancer in its very earliest stages. For the most effective medical care, combine self-exams with regular doctor's appointments and age- and health-appropriate cancer screenings.

Some signs to look for during your breast exam are nipple tenderness, lumps, thickening, changes in skin texture or enlargement of pores in the skin of the breast. Also examine your underarm area as the breast tissue spreads around your sides and armpits.

**LYING DOWN**

When lying down, your breast tissue will spread against the chest wall. Place a pillow under your shoulder and raise that arm above your head. Using the opposite hand, move the pads of your fingers around your breast, covering the entire area and armpit. Use light, medium and firm pressure. Check for nipple discharge and lumps, then repeat for the other side.

**IN FRONT OF A MIRROR**

With your arms at your sides, look at your breasts as you raise your arms over your head. You're looking for changes in the contour, swelling, dimpling of the skin or changes in the nipples. Rest your palms on your hips and press firmly to flex your chest muscles. Look for dimpling, puckering or changes, particularly on one side. Don't be alarmed if your breasts aren't symmetrical; most women aren't.

**IN THE SHOWER**

Hold one arm up and behind your head. Using your fingertips, check the entire breast and armpit area on that side by pressing down with light, medium and firm pressure. Look for lumps, thickening, a knot or any other changes. If you notice any changes, don't panic.

Most lumps, even, aren't cancer. But you do need to check with your doctor for a clinical exam whenever you have concerns. Combined with regular medical care and more in-depth screening, such as mammography, self-exams are a powerful tool in the early detection and successful treatment of breast cancer.

Here’s How It Works:

Sudoku Like puzzles? Then you’ll love sudoku

This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

NUISANCE "PARTS & LABOR""
ARIES - Mar 21/Apr 20 Aries, whether your mind is buzzing out of control or not, you have to find a way to get everything under control. There is much you need to accomplish this week.

TAURUS - Apr 21/May 21 Taurus, mornings usually aren't your best time of day. Put off making tough decisions until afterward or later when you have given yourself ample time to charge the brain.

GEMINI - May 21/Jul 20 Difficulties will eventually dissipate as your week progresses, Gemini. You will find you get some relief from what ails you as the days pass by.

CANCER - Jun 21/Jul 22 Emotional baggage doesn't line up with your free spirit, Cancer. Try to avoid conflict at all costs during the week and you'll find you are much happier for having done so.

 Leo - Jul 23/Aug 22 Prepare for surprises this week, Leo. They may come from you or someone else. This is an opportunity to play and have fun. Enjoy it for as long as it lasts.

VIRGO - Aug 23/Sept 22, things seem to be going well for you in many different areas. Clear thinking and contained emotions are the keys to your success in all of this. Keep up the good work.

LIBRA - Sept 23/Oct 22 It may take you a little while to get started this week Libra. You may feel like you're trying to turn over an engine on a cold morning. But eventually you will find your groove.

SCORPIO - Oct 23/Nov 21, you want to juggle all of your goals, but you simply take too much - as is your nature. Step back and prioritize your tasks so you can more easily achieve your goals.

SAGITTARIUS - Nov 22/Dec 21 Tempers may flare when someone criticizes someone you love, Sagittarius. You may want to be a hero, but step back and let things cool down.

CAPRICORN - Dec 22/Jan 19 Let your dreams linger a bit longer before getting out of bed this week, Capricorn. It's okay to indulge in some fantasies. They may inspire future endeavors.

AQUARIUS - Jan 20/Feb 18 Find a blend of rational and impulsive behavior, Aquarius. When the scales tip in one direction, you will find it is much easier to tackle what you need to do.

PISCES - Feb 19/Mar 20 Pisces, sometimes it is best to follow your emotions instead of your head as you make plans for the day. Figure out what works best for you.

ST. JUDE NOVENA

Thank you, May the Sacred Heart of Jesus, be adored, glorified, loved and preserved throughout the world now and forever. Sacred Heart of Jesus pray for us. St. Jude worker of miracles, pray for us. Say this prayer 9 times a day. By the 8th day, your prayers will be answered. It has never been known to fail. Praise multiplication must be fulfilled. Thank you for answering our prayers. SM

My voice has been compared to Bruno Mars.

Answer: Bruno Mars
Mammograms are X-ray pictures of your breast. They can detect breast cancer early, when it’s most treatable.

Regular mammograms are some of the best tests doctors have to detect breast cancer early, the Centers for Disease Control and Prevention says.

WHEN SHOULD I GET A MAMMOGRAM?

The American Cancer Society recommends regular, annual mammograms for women 45-54 years old. Before then, women over 40 can start to have the annual screening with mammograms if they or their health care providers choose to. Women 55 and older can switch to mammograms every two years if they want.

Screening should continue as long as a woman is in good health and expected to live 10 or more years. Because of family history, genetics or other factors, some women should also get MRIs along with their mammograms.

HOW IS A MAMMOGRAM DONE?

You’ll stand in front of an X-ray machine and a technologist will place your breast on a clear plastic plate. Another plate will firmly press your breast from above. The steps are repeated for a side view. The technologist will not be able to tell you your results; that has to wait for a radiologist. It may be uncomfortable, but it will only take a few minutes. Do not try to schedule your mammogram near your menstrual cycle as this can make your breasts more tender and the X-ray more uncomfortable.

Don’t wear perfume, deodorant or powder as these products can show up as white spots on the mammogram. Try to wear a top with a skirt or pants instead of a dress as you’ll need to undress from the waist up.

WHEN WILL I GET MY RESULTS?

You will usually get your results within a few weeks. If you haven’t heard within 30 days, contact your health care provider or the mammography facility.

If your mammogram is normal, you should continue to get mammograms at the regular intervals. Mammograms work best when they can be compared with previous ones. If your mammogram is abnormal, that doesn’t necessarily mean you have cancer, but you should have additional mammograms, tests or exams. You may be referred to a breast specialist or a surgeon, but again, that doesn’t mean you have cancer or need surgery. These doctors are experts in diagnosing breast problems and they can do follow-up tests.
